Diagnose premature ejaculation with the Premature Ejaculation Diagnostic Tool (PEDT)

The PEDT is a short five-question, psychometrically validated measure for diagnosing premature ejaculation.^{1,2}

1. How difficult is it for you to delay ejaculation?

2. Do you ejaculate before you want to?

3. Do you ejaculate with very little stimulation?

4. Do you feel frustrated because of ejaculating before you want to?

5. How concerned are you that your time to ejaculation leaves your partner sexually unfulfilled?

Add up your score:

Total score less than or equal to 8: No premature ejaculation

Total score 9/10: Probable premature ejaculation

Total score greater than or equal to 11: Premature ejaculation

The **PEDT** may also be used by men and their partners for **discreet self-assessment of premature ejaculation.**
